Subject: Importance of EPA

Administrator Pruitt,

Please do not allow the brevity of this message to detract from its gravity and commitment.

We as a species have proven consistently that we cannot be relied upon to protect the environment simply because it's the right thing to do. Profits and efficiency will generally prevail when making decisions which can effect the health of our planet. Therefore:

- 1) We must have strong, effective environmental regulation.
- 2) Regulations must be strictly enforced with stiff penalties for violations.
- 3) The EPA must be adequately funded to promote and enforce regulations.

Please do not gut the EPA. Please protect our planet and health.

Sincerely,

Melissa Green
